

Heidelberg Nephrology Forum

Symposium: Renal Tubulointerstitial Plasticity 24. February 2009

Program:

- 14.15 – 15.00** Epithelial-mesenchymal transition and metastasis caused by mutated epithelial-polarity regulators plus Ras: New principle in metastasis?
Prof. Dr. Hartmut Beug
(Institute for Molecular Pathology, Medical University of Vienna)
- 15.00 – 15.45** Origin of renal myofibroblasts in models of renal fibrosis
Prof. Dr. Brigitte Kaissling and Prof. Dr. Michel Le Hir
(Institute for Anatomy, University of Zürich)
- 15.45 – 16.00** Coffee
- 16.00 – 16.45** Epithelial lineage and signalling in mammalian kidney repair
Prof. Dr. Benjamin Humphreys
(Brigham and Women's Hospital, Harvard University Boston)
- 16.45 – 17.30** Epithelial mesenchymal transition does not contribute to TGF β induced kidney fibrosis
Prof. Dr. Wilhelm Kriz
(Anatomy and Developmental Biology, Medical Faculty Mannheim, University of Heidelberg)
- 17.30 – 18.15** Renal fibroblast and potassium channels
Prof. Dr. Joachim Hoyer
(Department of nephrology, University Hospital Giessen and Marburg, Philipps-University Marburg)

Venue: **DKFZ-Heidelberg**
Communication Center
Seminar Room K1
(Im Neuenheimer Feld 280)

Organizers: Prof. Dr. med. Norbert Gretz
(ZMF, Medical Faculty Mannheim)
Prof. Dr. med. Hermann-Josef Gröne
(Department of Cellular and Molecular Pathology, DKFZ)
Prof. Dr. med. Wilhelm Kriz
(CBTM, Anatomy and Developmental Biology, Medical Faculty Mannheim)
Prof. Dr. med. Franz Schaefer
(Pediatric Nephrology, Medical Faculty Heidelberg)
Prof. Dr. med. Martin Zeier
(Kidney Center Heidelberg, Medical Faculty Heidelberg)

Attendance is free. No registration necessary.
